PRODUKTINFORMATION

## Alpha-Ketoglutaric acid 300 mg

Spies a important role in the Citric Acid Cycle

### Nahrungsergänzungsmittel mit Alpha-Ketoglutaric acid

Alpha-Ketoglutaric acid (AKG) is a ketone derivative of the organic compound Glutamic acid. It plays an essential role for the orderly metabolism of all essential amino acids and the transfer of cell energy in the Citric Acid Cycle.

It is a precursor of Glutamic acid.

### Klean Labs - High-purity nutrients in effective dosing

Since 1990, the concentration of Supplementa is on orthomolecular nutrition, the knowledge of essential nutrients and vital substances, the building blocks of our health. With Klean Labs, the young brand founded in 2022, Supplementa sets quality standards such as effective dosing, proven origin and maximum naturalness. The German-produced product palette of Klean Labs focuses on the quality of the substance in vegan/vegetarian formulation: a minimum of additives for optimal effectiveness and appropriate dosages for maximum benefit.
